🔎 View Sources, SQL & Evidence

what if delay rate increaed to 30%. what impact can it can provide

⚠️ Simulation error: Target delay rate (30.0%) is not better than current rate (15.0%). Please supply a lower target.

🔎 View Sources, SQL & Evidence

My analysis: if we have asked to increase the delay rate and want to understand the impact then the answer is vague. Need check

3. what are possible reason of shipment delays

Headline Finding: The top delay cause is 'Supplier_Dispatch', accounting for 33.3% of all delays.

Supporting evidence indicates that 'Supplier_Dispatch' incidents average 6.2 days each, contributing significantly to the overall delay rate. Additionally, the highest delay rate among suppliers is attributed to SUP003 at 20.0%, with 6 out of 30 shipments delayed. Sources: shipments / suppliers_master / financial_impact (SQLite)
Confidence: 75%

🔎 View Sources, SQL & Evidence

4.is there any another reason for shipment delays apart from "Supplier dispatch"

Headline Finding: The primary cause of shipment delays is "Supplier Dispatch," accounting for 33.3% of all delays. Supporting Evidence: The

data indicates that "Supplier Dispatch" is the top delay cause, with 5 incidents averaging 6.2 days each. Sources: shipments / suppliers_master / financial_impact (SQLite)
Confidence: 75%

🔎 View Sources, SQL & Evidence

My analysis: when I asked about reason for shipment delays giving the reference of Supplier dispatch . Still it is responding Supplier Dispatch. nEED Check

5.what is total shipment cost for year 2022

Total supply chain cost 2022–2024:
17
,
443
,
000
(
a
v
g
17,443,000(avg484,528/month across 36 months).

My analysis: when I asked for specific year 2022, it still providing the cumulative value which is $17 million, it should give around $5.7m

6. Which supplier is causing the most financial damage and what should we do?

ssue: SUP003 is causing the most financial damage with a total financial exposure of

′
sperformanceissues,whichincludeadelayrateof20.0280,000 annually (Source: Globalmedtech Annual Report 2023 Full | Section: Appendix). Risk: If no action is taken, the continued underperformance of SUP003 could lead to further financial penalties and operational disruptions, exacerbating the already significant financial exposure of $1,477,470.

Sources: shipments / suppliers_master / financial_impact, Globalmedtech Annual Report 2023 Full | Section: Geopolitical Risk, Globalmedtech Annual Report 2023 Full | Section: Appendix. Confidence: 90%.

My analysis: Attached screenshot as the answer is going stretching behind the agent trace area. Also, why the answer is socluutered as there is no word space

7. what are root cause of the delay rate for south region

Highest delay rate by region: South at 23.7% (9 delayed of 38 total shipments).

My analysis: are we lagging in terms of data or there is insufficient data for this problem statement

8. what is delayed shipment cost for dec 2024

Total supply chain cost 2022–2024:

17
,
443
,
000
(
a
v
g
17,443,000(avg484,528/month across 36 months).

My analysis: I guess if we ask any of metric by bifurcation , it will still respond the overall value. Highly need to be checked

9. how manty shipments are delayed

The total number of delayed shipments is 15 out of 100 shipments, resulting in an overall delay rate of 15.0%. This includes delays from three suppliers: SUP003 with a 20.0% delay rate (6 out of 30 shipments), SUP001 with a 19.4% delay rate (7 out of 36 shipments), and SUP002 with a 5.9% delay rate (2 out of 34 shipments). Sources: shipments / suppliers_master / financial_impact (SQLite)
Confidence: 75%

⚠️ Note: Some claims in this response could not be fully verified against the source data. Please cross-check key figures before taking action.

10. what is 2024 ai roi

Latest ROI: 340% as of Dec-2024.

11. can you show the distribution of 2024 ai roi

Latest ROI: 340% as of Dec-2024.

Amy analysis: I f I ask for contribution to calculate 2024 roi , it only showing the 340% roi

12. how much money invested in ai in year 2023

No data available regarding the amount of money invested in AI in the year 2023. Sources: [financial_impact]
Confidence: 0%

🔎 View Sources, SQL & Evidence

My analysis: as I have asked how much Money been invested in 2023 , it give no data available. But in in “financial impact “ file there is column ai_investment_usd which has description "description": "Monthly spend on AI Control Tower platform”.
Senior person want to understand the investment so person can use any terms money or anything else. Again major issue of asking for particular month or year, it will always gives the combined value. Need a check

13

•

13. how much amount been spend on ai control platfrom in 2023

Total supply chain cost from 2022 to 2024 is

5,841,000,*withavoidablecostsamountingto*623,297, representing 10.7% of the total.
This indicates a significant portion of expenses that could potentially be mitigated.
Sources: shipments / suppliers_master / financial_impact (SQLite)
Confidence: 75%

My response: again the same issue of random answers

17. how many shipments got delayed

Total delayed shipments: 15 (across 3 supplier(s) and 5 product category/ies).

my analysis: I guess its correct on the basis of delayed status = Yes

18. what is the overall delay rate

SUP003 has the highest delay rate at 20.0% (avg 5.0 days per delay) across 30 shipments.

My analysis: I have asked overall delay rate which should be 15/100 i.e. 15% and see what response the system is giving. I dont think product is at all demo ready :(

19.what is total shipment value

No data available for total shipment value. Sources: shipments / suppliers_master / financial_impact (SQLite)
Confidence: 0%

⚠️ Note: Some claims in this response could not be fully verified against the source data. Please cross-check key figures before taking action.

My analysis: data is available and calculation been done. About $51.06M across 2 years.

20. what is the avergae shipment value

No data available. Sources: shipments / suppliers_master / financial_impact (SQLite)
Confidence: 0%

⚠️ Note: Some claims in this response could not be fully verified against the source data. Please cross-check key figures before taking action.

My analysis: data is available and simple value need to be calculated so called python math . About $510K per shipment.

21. what is annual supply chain cost

Total supply chain cost 2022–2024:
17
,
443
,
000

(
a
v
g
17,443,000(avg484,528/month across 36 months).

my analysis: I asked annual supply chain cost which is @5.85m per year

22. What is total expedited shipping cost in 2024?

Total expedited shipping cost is $379,997.

My analysis: About $40K.asking for 2024 not overall

23. which suppliers carries the most shipment value

The total supplier financial exposure is $1,477,470, indicating the overall shipment value across suppliers. However, specific shipment values per supplier are not detailed in the findings. Sources: shipments / suppliers_master / financial_impact (SQLite)
Confidence: 90%

My analysis: correct answer: SUP001 with about $30.3M total value.

24. which supplier has the highest risk operationally

The supplier with the highest operational risk is SUP003, exhibiting a 20.0% delay rate across 30 shipments, averaging 5.0 days per delay. This delay rate is the highest among all suppliers, with SUP001 following closely at 19.4% and SUP002 significantly lower at 5.9%. Sources: shipments / suppliers_master / financial_impact (SQLite)
Confidence: 60%

my analysis: correct answer and better description

25. which supplier has the higher risk financially

The supplier with the highest financial risk is SUP003, which contributes to a total supplier financial exposure of $1,477,470. This figure indicates a significant risk associated with this supplier, as it has the highest risk score among all suppliers. Sources: shipments / suppliers_master / financial_impact (SQLite)
Confidence: 90%

My response: correct answer would be sup001 as it carries 59% of shipment value on only 36% of shipments.

26. Which supplier has the largest 2024 spend share?

The supplier with the largest 2024 spend share is SUP003, with a total supplier financial exposure of $1,477,470. This figure indicates that SUP003 carries the highest financial risk within the supply chain, which could impact overall operational efficiency and cost management. Sources: shipments / suppliers_master / financial_impact (SQLite)
Confidence: 90%

my analysis: SUP003 with 37% of 2024 spend.

27. What is the key difference between SUP001 and SUP003?

The key difference between SUP001 and SUP003 is their overall on-time delivery (OTD) performance, with SUP001 exhibiting a significantly lower OTD rate. SUP001 has an OTD of 72.2%, which is 19.8% below its target of 92.0%, resulting in 6 service level agreement (SLA) breaches. Sources: shipments / suppliers_master / financial_impact (SQLite)
Confidence: 60%

my analysis: ideal answer would be “SUP001 is high-value / lower-volume and financially critical; SUP003 is lower-value / high-delay and operationally critical.”

28. which region has the highest delay rate

Highest delay rate by region: South at 23.7% (9 delayed of 38 total shipments).

my analysis: correct answer

29. which region carries the highes shipment value

No data available. Sources: shipments / suppliers_master / financial_impact (SQLite)
Confidence: 0%

⚠️ Note: Some claims in this response could not be fully verified against the source data. Please cross-check key figures before taking action.

My analysis: I guess the answer is available just that need to calculate. North at $20.1M.

30. Which category has the highest shipment value?

No data available regarding shipment values in the verified findings. Sources: shipments / suppliers_master / financial_impact (SQLite)
Confidence: 0%

⚠️ Note: Some claims in this response could not be fully verified against the source data. Please cross-check key figures before taking action.

my analysis: Diagnostic Equipment at about $36.9M.

31.Which category has the highest delay rate?

Highest delay rate by product category: PPE at 21.1% (4 delayed of 19 total shipments).

my analysis: correct answer

32.Why is PPE important even though value is low?

Headline Finding: PPE is crucial for maintaining operational integrity despite its low value.

PPE (Personal Protective Equipment) plays a vital role in ensuring the safety and compliance of operations within GlobalMedTech. Although the financial impact of PPE may appear low, its importance cannot be understated, particularly in the context of supply chain disruptions and operational delays. The current delay rate of 17.1% at GlobalMedTech significantly exceeds the industry benchmark of 87% for on-time delivery, indicating a need for robust safety measures to mitigate risks associated with operational failures.

Supporting evidence from the GlobalMedTech Annual Report 2023 highlights that improving demand forecasting accuracy from 82% to 91% could reduce stockout risks and excess inventory carrying costs, with an estimated annual saving of

280,000.Thisunderscorestheinterconnectednessofsafetymeasureslike PPEwithoveralloperationalefficiencyandcostmanagement.Furthermore,thereportindicatesthatthecompanyincurreddelaypenaltiesof124,000 due to SLA breaches, emphasizing the financial repercussions of operational lapses that PPE can help prevent.

To address these challenges, the following actions are recommended, ranked by priority:

Enhance PPE Compliance Training: Implement comprehensive training programs to ensure all employees understand the importance of PPE in preventing operational disruptions and maintaining safety standards.

Integrate PPE Usage into Operational Protocols: Establish clear protocols that mandate PPE usage in all relevant operational areas, reinforcing its role in minimizing risks associated with supply chain delays.

Monitor and Evaluate PPE Effectiveness: Regularly assess the impact of PPE on operational performance and safety metrics to ensure continuous improvement and alignment with industry standards.

My analysis: I dont what know I have asked what the system is responding. Why it providing " addressing the challenges" when it is not asked for . Answer could be simpl like "Because it has the highest delay rate, so it creates operational pain even if value is small."

33. What is the average delay for delayed shipments?

The average delay for delayed shipments is 5.0 days. This figure is derived from the highest delay rate supplier, SUP003, which has a 20.0% delay rate across 30 shipments, resulting in an average delay of 5.0 days per delayed shipment. Sources: shipments / suppliers_master / financial_impact (SQLite)
Confidence: 60%

Answer: 6.0 days.

34. What is the maximum delay observed?

The maximum delay observed is 20.0%, attributed to supplier SUP003 across 30 shipments. This supplier has the highest delay rate, with 6 out of 30 shipments delayed, averaging 5.0 days per delay. Sources: shipments / suppliers_master / financial_impact (SQLite)
Confidence: 75%

Answer: 12 days.

35. What is the main driver of delays?

The main driver of delays is 'Supplier_Dispatch,' which accounts for 33.3% of all delays, with an average delay of 6.2 days per incident. This indicates that a significant portion of shipment delays can be traced back to issues related to supplier dispatch processes. Sources: shipments / suppliers_master / financial_impact (SQLite)
Confidence: 75%

Answer: Supplier_Dispatch, which accounts for 5 of 15 delays, or about one-third.

36. What percentage of delays are due to internal / fixable causes?

The percentage of delays attributed to internal or fixable causes is 33.3%. This figure represents the proportion of delays caused by 'Supplier_Dispatch', which is identified as the top delay cause, accounting for 5 incidents with an average delay of 6.2 days each.
Sources: shipments / suppliers_master / financial_impact (SQLite)
Confidence: 75%

Answer: Roughly two-thirds, because supplier dispatch, documentation, and some paperwork-related causes are internal or controllable.

37. What is the SLA breach rate?

Total SLA breaches: 14 (above threshold of 10).

Answer: 14%.
Math: 14 breaches out of 100 shipments.

38. Which supplier has the most SLA breaches?

Total SLA breaches: 14 (above threshold of 10).

Answer: SUP001 and SUP003 both show 6 breaches in the playbook context, but your app should be checked carefully because this has varied in some earlier outputs.

Answer: About 11%.
Math: $623K / $5.84M ≈ 10.7%.

42. What changed most from 2022 to 2024?

The most significant change from 2022 to 2024 is the improvement in the overall delay rate, which decreased to 25.0% in December 2024 across 4 shipments. This marks a positive trend compared to the previous year, indicating enhanced supplier performance and operational efficiency. Sources: shipments / suppliers_master / financial_impact (SQLite)
Confidence: 75%

⚠️ Note: Some claims in this response could not be fully verified against the source data. Please cross-check key figures before taking action.

Answer: Expedited shipping fell the most proportionally, from $179K to $40K, about a 78% reduction.

43. What happened to delay penalty from 2022 to 2024?

The delay penalties incurred against SLA breach clauses in customer contracts amounted to $124,000 in 2023, with 13 breach events recorded during the year. However, there is no specific data available regarding delay penalties for 2022 or projections for 2024. Sources: shipments / suppliers_master / financial_impact (SQLite)
Confidence: 75%

⚠️ Note: Some claims in this response could not be fully verified against the source data. Please cross-check key figures before taking action.

Answer: It dropped from $172K to $87K, about a 49% reduction.

44. When did AI go live?

The most recent month recorded a 25.0% delay rate across 4 shipments, indicating a trend of improvement compared to January 2023. In terms of supplier performance, SUP003 has the highest delay rate at 20.0%, with an average delay of 5.0 days per incident across 30 shipments. Sources: shipments / suppliers_master / financial_impact (SQLite)
Confidence: 75%

Answer: July 2024.

45. What happened after AI go-live?

After the AI go-live, the most significant finding is that the delay rate for shipments has reached 25.0% in the most recent month (December 2024), which indicates a concerning trend despite improvements compared to January 2023. The highest delay rate among

suppliers is attributed to SUP003, with a 20.0% delay rate across 30 shipments, where 6 shipments were delayed. Sources: shipments / suppliers_master / financial_impact (SQLite)
Confidence: 75%

Answer: ROI improved month by month, and on-time rate improved from the high-70s / low-80s to 93% by Dec 2024.

46. No data available. Sources: shipments / suppliers_master / financial_impact (SQLite)
Confidence: 0%
⚠️ Note: Some claims in this response could not be fully verified against the source data. Please cross-check key figures before taking action.

Answer: About $307K net.
Math: $401K savings - $94K investment = $307K.

47. What is the peak monthly ROI?

Latest ROI: 340% as of Dec-2024.

Answer: 340% in Dec 2024.

48. Why is AI ROI credible here?

Latest ROI: 340% as of Dec-2024.

Answer: Because investment and savings are explicitly tracked in financial_impact, and the logic is tied to observed cost reductions in avoidable categories.

49. What is the single biggest story in the dataset?

The single biggest story in the dataset is the high delay rate associated with supplier SUP003, which stands at 20.0%. This delay rate is the highest among all suppliers, with 6 out of 30 shipments delayed, averaging 5.0 days per delay. Sources: shipments / suppliers_master / financial_impact (SQLite)
Confidence: 75%

Answer: Avoidable cost dropped from $1.01M in 2022 to $623K in 2024 while on-time rate improved from 79% to 84% and AI delivered 4.3x return in 2024.

50. Why is SUP001 still strategically important even though SUP003 is more delayed?

SUP001 remains strategically important despite SUP003's higher delay rate due to its overall performance metrics and critical role in the supply chain. SUP001 has a delay rate of 19.4%, which is slightly lower than SUP003's 20.0% (Source: shipments table). Sources: shipments table, suppliers_master, financial_impact. Confidence: 60%.

Answer: Because SUP001 carries 59% of shipment value, so even a small reliability issue has a large financial impact.

51. What happens if SUP003 delay rate improves from 20% to 10%?

SUP003 has the highest delay rate at 20.0% (avg 5.0 days per delay) across 30 shipments.

Answer: Delay rate improves by 50%, delayed shipments reduce from 6 to 3, and the model estimates meaningful expedited-cost savings depending on the chosen allocation logic.
